### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

### Reasons For Allowance

Claims 1 – 21, 24 – 26, 28, 30, 34, 35, 37 – 55 are allowable.

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior arts made of record fail to suggest a method for constructing at least one digital input signal and providing at least one analog representation signal thereof, comprising: a DSP is calculated n digital outputs, by using said at least one digital input signal and- the identified model of said constructing device, (d) said n digital outputs are received by k discrete output devices comprising, in total, n digital inputs, m analog outputs, and simple conversion rules between said n digital inputs and said m analog outputs, (e) said MIMO system receiving said m analog outputs, and providing at least one output analog signal equivalent to said at least one digital input signal. Moreover, in combination with other limitations of the claims the prior arts made of record fail to suggest a method corresponding MIMO stage to each one of said m analog outputs, excluding first MIMO stage, are receiving at least one analog input signal from the preceding stage and the appropriate analog signal said at least one discrete output device; first MIMO stage is receiving only the appropriate analog signal from said at least one discrete output device; all m MIMO stages are providing at least one output analog signal; last MIMO stage is providing at least one output analog signal equivalent to said digital input signal. Furthermore, in combination with other limitations of the claims the prior arts made of record fail to suggest a multi-stage digital to analog waveform converter comprises a means for adding at least one predefined correction to an amplified signal,

Art Unit: 2819

wherein the multi-stage digital to analog waveform converter comprising digital signal processing means calculating the corrections by utilizing the relationships between the corrections and at least one of the amplified signal. In combination with other limitations of the claims the prior arts made of record fail to suggest a parallel multi-stage digital to analog converter waveform converter comprising a common DSP whereby the DSP is treated a crosstalk effect, whereby each of the plurality of the digital to analog waveform converters comprises amplifier for amplifying an input signal, integration means for integrating the amplified signal, means for adding predefined corrections to the amplified signal. In combination with other limitations of the claims the prior arts made of record fail to suggest a device comprising a DSP connected to at least one digital input, a synchronization clock and at least one discrete output device, whereby the DSP, occasionally or within a repetitive training period, is identifying a model of the digital to analog waveform converter for creating a representation of the relationships between the digital outputs of the DSP and at least one of the analog output signals of a MIMO device whereby the DSP while not in training mode is calculating the appropriate input to the at last one discrete output device using the model to provide at least one output analog signal equivalent to the digital input signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
